Security Doors

Protecting secure staff areas is a major objective for many retail and commercial environments. It is important to protect against unwanted intrusion at the same time as allowing fast and efficient access to authorised persons.

Our extensive range of Secure Doors offer just that flexibility. With models suitable for both internal and external applications and designs that meet the needs of different environments, they offer unrivalled peace of mind.

The doors successfully resist both physical and ballistic attack. They integrate high-specification construction, high-security locking and stringent modern testing with a sizeable range of quality features such as interlocking doors.

A wide choice of bespoke options is also available to meet your individual needs.

Product range includes:

- Internal Doors: Staffline
- Internal & External: Sentinel, Citadel, Stalwart

Typical customers include:

- Cash Offices
- Secure Areas
- Store Rooms
- Retail Environments
- Police Stations
- Educational Establishments
- ATM Room Doors
- Sub Stations
- Financial Institutions
- Leisure Centres

Security Doors

Gunnebo offers a range of high performance doors which have been independently tested to ensure that they meet the toughest standards.

Staffline
Sentinel
Citadel
Stalwart

Staffline

The Staffline Door is designed to offer a high degree of protection against physical and firearm attack, ideally opening out towards the line of expected attack. This door can be easily installed within a prepared opening to offer a high degree of protection against daytime raiders attempting to gain entry to a secure area. It is also available without locks fitted and with lock cut-outs pre-factory cut.

Key Features and Benefits

- Internal use
- Offers ballistic protection to G1/G2 Level of BS 5051, Part 1 (1988), BS EN 1063 BR4
- Chubb 3R35 locking
- Range of accessories available

Sentinel

The Sentinel Door is designed to meet the customers' specific fire resistance requirements.

Key Features and Benefits

- Internal and external use
- Offers G1 or G2/S86 ballistic resistance to BS 5051, Part 1 (1988)
- Certified four hour door complying with BS 476, Part 22
- Chubb tri-locking system
- Range of accessories available

Citadel

The Citadel anti intrusion door has been designed and certified to meet the most exacting standards as defined by the Loss Prevention Council (UK).

Key Features and Benefits

- Internal and external use
- Offers protection from Levels 2 through to 6
- Versatile
- Range of accessories available

Stalwart

The Stalwart Door and Frame set has been developed primarily for business and commercial premises. It provides defence against the all too familiar problem of break-ins via insufficiently protected rear entrances.

Key Features and Benefits

- Internal and external use
- Constructed from heavy duty steel
- 3 point cylinder mortice locking system and a 2-point emergency exit panic bar
- Range of accessories available

Planning, Installation and After Sales Service

Planning and Installation

Our teams are available to help you at every stage of your project – from design, specification and cost planning through to determining a flexible installation schedule. Once a schedule is agreed, all products will be carefully delivered and expertly installed by trained Gunnebo installers. First class workmanship is assured, as is prompt completion within the contracted timescales.

After Sales Service

When your project is completed and our products are installed, we have a dedicated team of service engineers available to maintain your products nationwide. Working with our customer support advisors they ensure you receive 24/7 backup should a problem ever arise.

Planning, products, installation, back-up...the Complete Service, exclusively from Gunnebo. It's our commitment, and your guarantee of total peace of mind.

Other products in the Gunnebo range include -

Fencing

A wide range of advanced fencing products that combine the highest quality, strength and durability to offer protection in any domestic or high security situation.

Gates

From domestic swing gates to more sophisticated impact related models, our gates provide optimum security for entrances, regardless of the width required.

Vehicle Control

A wide range of barriers, bollards and road-blockers, manufactured to uncompromising standards to provide optimum site protection.

Entrance Control

Low and full height products, manufactured to the highest specification, designed to balance optimum security with smooth traffic flow.

ATM Protection

Comprised of self-contained, compact enclosures, doors and walling systems, the range provides exceptional ballistic and physical protection.

Staff & Cash Security

Screens and counters of unrivalled quality deliver outstanding protection, while our tills and cash handling equipment offer a wide choice of designs and optional features.

Interlocks & Automation

A range of interlocking doors that can be integrated with other security systems to deliver the degree of protection for people and assets required.

Retail Electronics

Electronic Article Surveillance (EAS) products to tag merchandise in store and "SafePay™" an automated system that relieves staff of cash handling responsibilities.

Safe & Vault Equipment

Featuring the most reliable brands, Chubb safes, Rosengrens and SecureLine, the range includes graded and non-graded safes, vault rooms, doors and safe deposit lockers.

Banking Automation

State-of-the-art products, packed with quality features, that ensure depositing and withdrawing cash or takings is fast and convenient – 24/7.

Secure Walling

Flexible modular walling for partitioned or stand-alone structures that is strong, compact, cost effective and quick to install. Available in a choice of colours and finishes.
